 Closed centres occur when the pawn
 structure in the middle of the board is
 fixed. Often the pawn chains of the two
 sides interlock. Files for rooks and
 diagonals for bishops are often blocked
 and the maxim that knights are better
 than bishops in such positions normally

rings true. Positions with closed centres tend to lead to slower, more strategic play where flank attacks need to be prepared and developed. Here I will examine a game played by two of the modern greats in which Black gradually outplays White using instructive strategic play. ~ G. Kasparov - V. C84: Closed Ruy Lopez: Unusual White
6th moves Geller,E: 'Inf 23/296' Chapter
6...Be7 is a move which crops up now
and then. The Polish IMs Sydor and
Pytel seem to have done some joint
homework on it and even the great
Vassily Smyslov has played it now and
then. Unfortunately for him he finds
Jens Kristiansen well prepared in this

game, with 9.Nc3 being a very
interesting novelty. White's pieces
become tremendously active and
dominate the center the former World
Champion must count himself as having
been very fortunate to escape. 1.e4 e5

B55: Sicilian: 2...d6 3 d4 cxd4 4 Nxd4 Nf6 5 f3 In this chapter we will examine **5...a6!?**, a variation which is seen in practice from time to time, especially at club level. The reasons for choosing **5...a6** can be the desire to enter a Hedgehog position or simply to play the Najdorf move anyway. In my opinion, neither are dangerous for us, and we have good prospects of achieving an opening advantage. We reach our initial position after the following moves: **1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.f3 a6 6.c4 e6 7.Nc3 Be7 8.Be3 Nbd7N**

Nf6 5 f3 In this chapter we will examine
5...a6!?, a variation which is seen in
practice from time to time, especially at
club level. The reasons for choosing 5...
a6 can be the desire to enter a

neither are dangerous for us, and we
have good prospects of achieving an
opening advantage. We reach our initial

B01: Scandinavian Defence The Modern Calabrese Steinitz was born in a Prague ghetto, into the family of a tailor, in which he was child number nine; the next four all died in early childhood and he, the last remaining, maintained that he was the 13th all through his life. He learned chess by watching his father play. After finishing school in the mid-fifties, he continued his education in Vienna, which

had ancient chess traditions (it is sufficient to recall the names of Allgaier, Hamppe and Falkbeer) . When in London and Paris the fame of Morphy and Anderssen was at its height, in a small Vienna café a certain poor student was making a living by playing for stakes... Chess captivated Steinitz entirely. For the sake of it he gave up the higher polytechnic school, which promised the comfortable life of a qualified engineer, and soon he was the strongest player in Vienna. And when in 1862 an invitation arrived from London to the second international tournament, the Vienna Chess Society decided to send their 26-year-old champion to it. Steinitz's international debut was not bad: sixth prize out of 14 participants (all of five pounds sterling!) , but the main thing was his memorable win over Mongrédien. The winner of the tournament, the legendary Adolf Anderssen, acknowledged it to be 'the most bold and brilliant game', and called Steinitz 'a rising chess star'. In turn, the organisers called the game 'the diamond of the Austrian champion' and awarded it a special prize, as the most brilliant in the tournament. **1.e4 d5 2.exd5 Qxd5 3.Nc3 Qd8 4.d4 Nf6 5.Nf3 e6 6.Bd3 b6N**

Blitz 10min C67: Ruy Lopez: Berlin Defence: 4 0-0 Nxe4 One of the main problems of modern opening preparation is how to break Black's walls in a series of fashionable hyper-solid lines. At first sight, this may seem to be a perennial problem, but things have not always been like this. Fashion and general approach change with the alternation of generations. In the best years of Tal and Kasparov, for instance, one common question was how to avoid being smashed tactically in the King's Indian! Moreover, some of Black's most reliable openings of today enjoyed a rather questionable reputation in the past. ** After the supposedly warming-up days, the third round scheduled matches between teams of similar strength already, which makes natural the emergence of solid variations. The good news for those believing in the inexhaustible character of our favourite game is that in a few important games between strong players Black's walls did not withstand White's pressure. The first game of the today's selection features what may be the main source for White's nightmares: the Berlin Defence. In the past, this was considered a modest variation, suited only for players with good defensive skills in desperate need of a draw with Black. Things have

changed quite a lot over the past decades... Marin,Mihail: 'Marin,M: 'One of the main problems of modern opening preparation is how to break Black's walls in a series of fashionable hyper-solid lines. Things have changed quite a lot over the past decades...' Current Reputation: Playable for both sides I have always found it difficult to refer to novel ideas in the Berlin Defense as opening novelties, since they technically belong to late middlegames, or even endgames. However, terminology aside, one can hardly deny the importance of such ideas (especially for White), as

Black's resilience in this opening line has acquired the status of almost mythical proportions. Naturally, the majority of important developments in the Berlin Defense occurs during top-tier events, so it's no wonder that the featured game between Kasimdzhanov and Radjabov took place in the second round of the FIDE Grand Prix event that is currently under way in Baku. Defence: 4 0-0 Nxe4 Fireworks in the
Berlin? In this volume of Informant I will
present to you my ideas and findings in
the trendy Berlin line. Avoiding the so-
called "Berlin Ending" led to some
interesting variations and, of course, to
quite a few dull ones. The line I am
exploring in this article can be played in
various ways, depending on the players
motivation, style, or tournament
circumstances. I hope you will find my
analysis to be enlightening and inspiring,
so you may handle the lines in question
with confidence! 1.e4 e5 2.Nf3 Nc6

Blitz 8min+1sec C67: Ruy Lopez: Berlin Defence: 4 0-0 Nxe4 When I started playing chess in the mid 1970s, India's main distinction was that it's only IM (!) Manuel Aaron was at that time the first entry in most chess encyclopaedias. Almost five decades later the subcontinent is a huge chess superpower and if you were to credit a single person, who most significantly contributed to this development, it would certainly be Vishy Anand. Five years my junior, we first met at the World U20 Championship in 1984. If I remember correctly, we both lost in the last round and I was certainly not pleased with my final score 8/13, the worst result in my 3 World Juniors. Looking at it nowadays, it was the only time I ever came ahead of Vishy, even if by a meagre half-point. Anand became World Junior Champion (1987), India's first GM (1988) and qualified for the Candidates (1990), all well before I even earned my GM title. And that was certainly not the end, he went on to become multiple World Champion in all conceivable formats and time-controls. In my opinion, one of the main reasons he rose to the very top was that his indisputable talent was multi-faceted. The following game illustrates his strategical and technical

prowess, in the Berlin endgame he produces a text-book example of converting White's kingside majority. I have already annotated his fight with Ponomarev earlier, even including in the second edition of my book "Instructive Modern Chess Masterpieces". I will again stress the emphasis on the first adjective "instructive" and try to put my earlier notes in perspective - after all the Berlin is here to stay, Vishy himself employed it with both colours and 20 years later it's as popular as ever, if not more so... Als ich Mitte der 1970er Jahre mit dem Schachspiel begann, zeichnete sich Indien vor allem dadurch aus, dass der einzige indische IM (!) Manuel Aaron damals der erste Eintrag in den meisten Schachencyklopädien war. Fast fünf Jahrzehnte später ist der Subkontinent eine riesige Schach-Supermacht, und wenn man eine einzelne Person nennen sollte, die am meisten zu dieser Entwicklung beigetragen hat, dann wäre es sicherlich Vishy Anand. Fünf Jahre jünger als ich, trafen wir uns zum ersten Mal bei der U20-Weltmeisterschaft im Jahr 1984. Wenn ich mich richtig erinnere, haben wir beide in der letzten Runde verloren, und ich war mit meinem Endergebnis von 8/13, dem schlechtesten Ergebnis bei meinen drei Weltmeisterschaften, sicher nicht zufrieden. Wenn ich es heute betrachte, war es das einzige Mal, dass ich vor Vishy lag, wenn auch nur um einen mageren halben Punkt. Anand wurde Juniorenweltmeister (1987), Indiens erster GM (1988) und qualifizierte sich für die Kandidatenturniere (1990), alles lange bevor ich meinen GM-Titel erlangte. Und das war noch lange nicht

das Ende, denn er wurde anschließend mehrfacher Weltmeister in allen denkbaren Formaten und Zeitkontrollen. Meiner Meinung nach war einer der Hauptgründe für seinen Aufstieg an die Spitze, dass sein unbestreitbares Talent sehr vielseitig war. Die folgende Partie illustriert sein strategisches und technisches Können, im Berliner Endspiel liefert er ein Lehrbuchbeispiel für die Umwandlung der weißen Königsflügelmehrheit. Ich habe seinen Kampf mit Ponomarev bereits früher kommentiert, sogar in der zweiten Ausgabe meines Buches "Instructive Modern Chess Masterpieces". Ich möchte noch einmal die Betonung auf das erste Adjektiv "lehrreich" legen und versuchen, meine früheren Notizen in die richtige Perspektive zu rücken - schließlich ist die Berliner Variante sehr beliebt, Vishy selbst hat sie mit beiden Farben gespielt und 20 Jahre später ist sie so beliebt wie eh und je, wenn nicht sogar noch beliebter... CCHeaderStart CCGame: 'The file that matters' CCHeaderEnd CC

When I played through the following game, I had the feeling that I'd seen a great game, but I didn't understand why. After quite a bit of analysis, I think I do ! The opening is a solid anti-Berlin variation with a symmetrical pawn structure and only the faintest initiative for White. Between moves 25 and 34, AlphaZero unbalances the position: White gains an outpost for its knight on c5, control of the open e-file, an invasion square on e6 and weak black queenside pawns on a5 and c6. However AlphaZero slowly reels White in, first creating a dark-square weakness on White's kingside and then converting this weakness into an advanced pawn on g3 with 41... hxg3. Stockfish lets it all happen, evaluating the position before and after with exactly the same value (0.00) . The g3-pawn restricts the movement of the white king and AlphaZero uses this to stretch White's position to breaking point by opening an extra file - the a-file - and targeting White's queenside pawns, after which White's position eventually collapses. Game themes: 1. Avoiding the automatic occupation of an open file 2. Using a rook's pawn to weaken the opponent's king's position 3. Advanced bishop outpost 4. Improving the position of the king before the next wave of attack Game: 'The file that matters'

In Chapter 2 we looked at AlphaZero's evaluation mechanisms through this middlegame. When I played through the following game, I had the feeling that I'd seen a great game, but I didn't understand why. After quite a bit of analysis, I think I do ! The opening is a solid anti-Berlin variation with a symmetrical pawn structure and only the faintest initiative for White. No account of early 2017 in the chess
world would be complete without
mentioning Adhiban's remarkable debut
in Tata Steel, where he finished third
and could have done even better. His
opening choices were the source of
much comment (not many people get a
winning position against Carlsen on the

black side of a Scandinavian), and he got a great position with the c3-Sicilian against Van Wely in round 1. This game ended up determining the clear winner of the 2008 European Championship. This game ended up determining the clear winner of the 2008 European Championship. Tiviakov: 'This game from the last round of the European Championship was extremely important. Only this victory allowed me to win the tournament alone, without any tie. There were 8 players in the lead before the start of the last round and I was the only one to win (the other 3

games were quick draws). Emil also offered me a draw in the evening before this game. But being White in the last round and also having a big positive score against Emil I saw no single reason to accept it.

' Tiviakov: 'Diese Partie aus der letzten Runde der Europameisterschaft war extrem wichtig. Nur durch diesen Erfolg war es mir möglich, alleiniger, ungeteilter Turniersieger zu werden. Vor dem Start der letzten Runde führten 8 Spieler punktgleich, und ich war der Einzige, der gewann. Emil hatte mir am Vorabend der Partie ebenfalls Remis angeboten. Aber da ich Weiß hatte und dazu ein kräftiges Plusergebnis gegen Emil habe, sah ich keinerlei Grund anzunehmen.' 1.e4 c5 2.c3 d5 3.exd5 Qxd5 4.d4 Nf6 5.Nf3 e6 6.Na3 Nc6 7.Be3 cxd4

C67: Ruy Lopez: Berlin Defence: 4 0-0 Nxe4 Game 2 - The First Official Match *** The World Chess Championship 1886 was the first official World Chess Championship match contested by Wilhelm Steinitz and Johannes Zukertort. The match took place in the United States, the first five games being played in New York City, the next four being played in Saint Louis and the final eleven in New Orleans. The winner was the first player to achieve ten wins. Wilhelm Steinitz won the match 10 : 5, winning his tenth game in the twentieth game of the match. There were five draws. Previously, there were a number of "unofficial" world

championship matches held between the undisputed leading players of the day, but talk of an official World Championship did not occur prior to the 1866 match between Steinitz and Adolf Anderssen. Steinitz won that match (+8 - 6 =0) and although he made no known reference to a "World Championship" at the time, in later life he would sometimes backdate the tenure of his reign to the date of the Anderssen match. However, most historians now accept that the 1886 match between Steinitz and Zukertort was the first official World Championship match. Zukertort staked his rival claim to being the world's leading player by a number of tournament wins, notably Paris 1878 and London 1883. The following year (1884) saw the death of Paul Morphy and so finally, nothing stood in the way of a first official World Championship match between the two rivals. As there was a degree of hostility between them, the match arrangements were somewhat protracted and lasted almost three years. Disagreement over the choice of venue was resolved when Steinitz finally persuaded Zukertort to accept the United States, his new place of residence, over London. This was mostly due to the better conditions offered to the players by the American organizers. Zukertort was given the princely sum of \$750 to make the trip across the Atlantic, and the winner of the match was promised a quarter of the proceeds from the betting syndication. The time limit was determined as 30 moves in 2 hours, followed by another 15 moves in each subsequent hour. For the first time in chess history, a demonstration board measuring

approximately 1 metre square was erected above the players, so that the spectators could follow the game while seated. Play commenced on January 11, 1886 at 14.00 hours, in the Cartiers Academy Hall, No. 80, Fifth Avenue, New York City. After four wins of one player, which happened after the first five games, the venue switched to Saint Louis for a further four. With the match result still in the balance (4 : 4, with one draw), the concluding chapter was played in New Orleans, by which time Zukertort was said to be living on his wits, physically fatigued and approaching mental breakdown. Steinitz, on the other hand, appeared to be playing more robustly, with a bottomless pit of mental stamina. His strategic mastery quickly took control of the match and he wrapped things up with a further six wins, four draws and just one defeat. The final game ended on March 29, 1886 when Zukertort tendered his resignation and congratulated the new World Champion. In the aftermath, it was apparent that Zukertort's play had been overly impulsive; he had regularly taken half the time of Steinitz and it is likely that this was connected to a heart condition he had carried since childhood. In actual fact, two years later Zukertort died of a heart attack. **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.0-0 Nxe4 5.Re1 Nd6 6.Nxe5 Nxe5 7.Rxe5+ Be7 8.Nc3 0-0 9.Bf1N**

D01: Veresov Opening Including this game is basically just for a bit of fun. Black plays a very dodgy opening and his position is resignable after seven moves. However, White doesn't play the most precise refutation

and before we know it Black has tremendous compensation for the piece.

Blitz 3min+1sec C67: Ruy Lopez: Berlin Defence: 4 0-0 Nxe4 With the score being 51/2-41/2 to Carlsen with 2 games to go, the match has reached its crucial moment. Yet still there maybe was an expectation of silence before the storm? A draw in this game at first seemed like a good result for both, as Carlsen would guarantee himself a playoff, while Anand could gamble everything with the white pieces in game 12. In tournaments situations might often arise in which both player have mutual interests in a draw, but in matches it is important to remember that what is good for your opponent, is bad for you! The discussions about the right strategy in these situations reflect that its probably a very close decision, with no obvious "correct" answer. In Brissago 2004, against Leko, Kramnik choose the Benoni as Black, in order to gamble, while here Anand choose the Berlin, seemingly happy to make a draw. 1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.0-0 Nxe4 5.d4 Nd6 6.Bxc6 dxc6 7.dxe5 Nf5 8.Qxd8+ Kxd8 9.Nc3 Bd7 10.h3 h6 11.b3 Kc8 12.Bb2 b6 13.Rad1 c5 14.Nd5

Blitz 3min B41: Sicilian: Kan Variation: 5 c4 In this chapter we will examine 5... a6!?, a variation which is seen in practice from time to time, especially at club level. The reasons for choosing 5... a6 can be the desire to enter a Hedgehog position or simply to play the Najdorf move anyway. In my opinion, neither are dangerous for us, and we

have good prospects of achieving an opening advantage. We reach our initial position after the following moves: 1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.f3 a6 6.c4 e6 7.Nc3 Be7

A25: English Opening vs King's Indian with ...Nc6 but without early d3 Hello Chessable members ! I'm Grandmaster Pentala Harikrishna and I'll be showing you my game of the day from round 1 of the Candidates 2020 tournament. I chose this game because Ding is a very solid player and very rarely loses. Also in this round, we have two victories with black, both players who lost with white are very solid players. It was a tough choice for me as Ian also won a nice game against Anish. I liked this game because, for a large part of the game, Ding was doing very well. But when Wang Hao got a chance, he took it ! He didn't give Ding any chance to recover.

rating, and my expectations were quite
high. But despite this, the tournament
was not going well for me, as I had only
4 points out of 8 rounds, and I was
somewhere in the middle in the
standings. Nevertheless, I am happy that
I managed to win the last three games

again. This game is another fun one
though. Now, yes, George is a FM, but
this one is a strong one. 2400 is a very
good rating for an FM player, this guy is
also young, at this point (2021) he's 19
